

Merson House
3922 Old Columbia Pike
HO-629

Located about 100 feet north of the Old Columbia Pike, this 2 1/2 story American Four Square reflects many of the characteristics of this popular style including the box shape, high hipped roof, central gable dormer and full-width front porch. The house, sits on 0.62 acres, and is two bays wide and two bays deep.

This house is significant as an example of early suburban planned development in Howard County. it is part of an important intact corridor on the outskirts of Ellicott City lined with early 20th century buildings.

While several planned developments were built along the B&O Railroad's Washington branch near Laurel in the late 19th century, this development was one of the first of its type in the northern section of the county. Unlike neighboring counties, Howard County never experienced the housing boom created by arrival of rail service. This small development along Old Columbia Pike represents some of the few commuter oriented suburban housing built in the county before World War II.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Located about 100 feet north of the Old Columbia Pike right-of-way, this 2 1/2 story American Four Square reflects many of the characteristics of this popular style including the box shape, high hipped roof, central gable dormer and full-width front porch. The house, which sits on 0.62 acres, is two bays wide and two bays deep. The door is in the east bay of the facade and the windows are arranged symmetrically with two pairs of windows on the second floor and a bank of three windows on the first floor. The hipped roof gable dormer holds a pair of windows.

A hipped roof porch supported by round columns runs the width of the facade. Three wood rails link the posts and a lattice apron covers the openings between the porches' brick piers.

There is a bay window on the north end of the west side and a recently added exterior brick chimney runs up the south end. Two windows flank the chimney on the second floor. On the east side four symmetrically spaced windows (all singles except for the window on the north end on the first floor which is paired) flank a single fixed pane square window in the center.

On the north side three windows surround a fixed pane window in the center and a single bay vestibule extends from the east end. All of the window except the fixed sash windows are double hung 3/1 sash with the panes divided vertically, and are flanked by louvered shutters.

The house has a rolled asphalt roof and rests on a cut random coursed stone foundation. A two-bay gabled-roof garage, probably not original, is north west of the house.

Prepare both a summary paragraph of significance and a general statement of history and support.

The house abuts the scenic Cat Rocks Branch valley. Although aluminum siding covers the wood frame, the house is a significant example of vernacular Prairie Box design and retains its overall early 20th century character.

This house is significant as an example of early suburban planned development in Howard County. It is part of an important intact corridor on the outskirts of Ellicott City lined with early 20th century buildings.

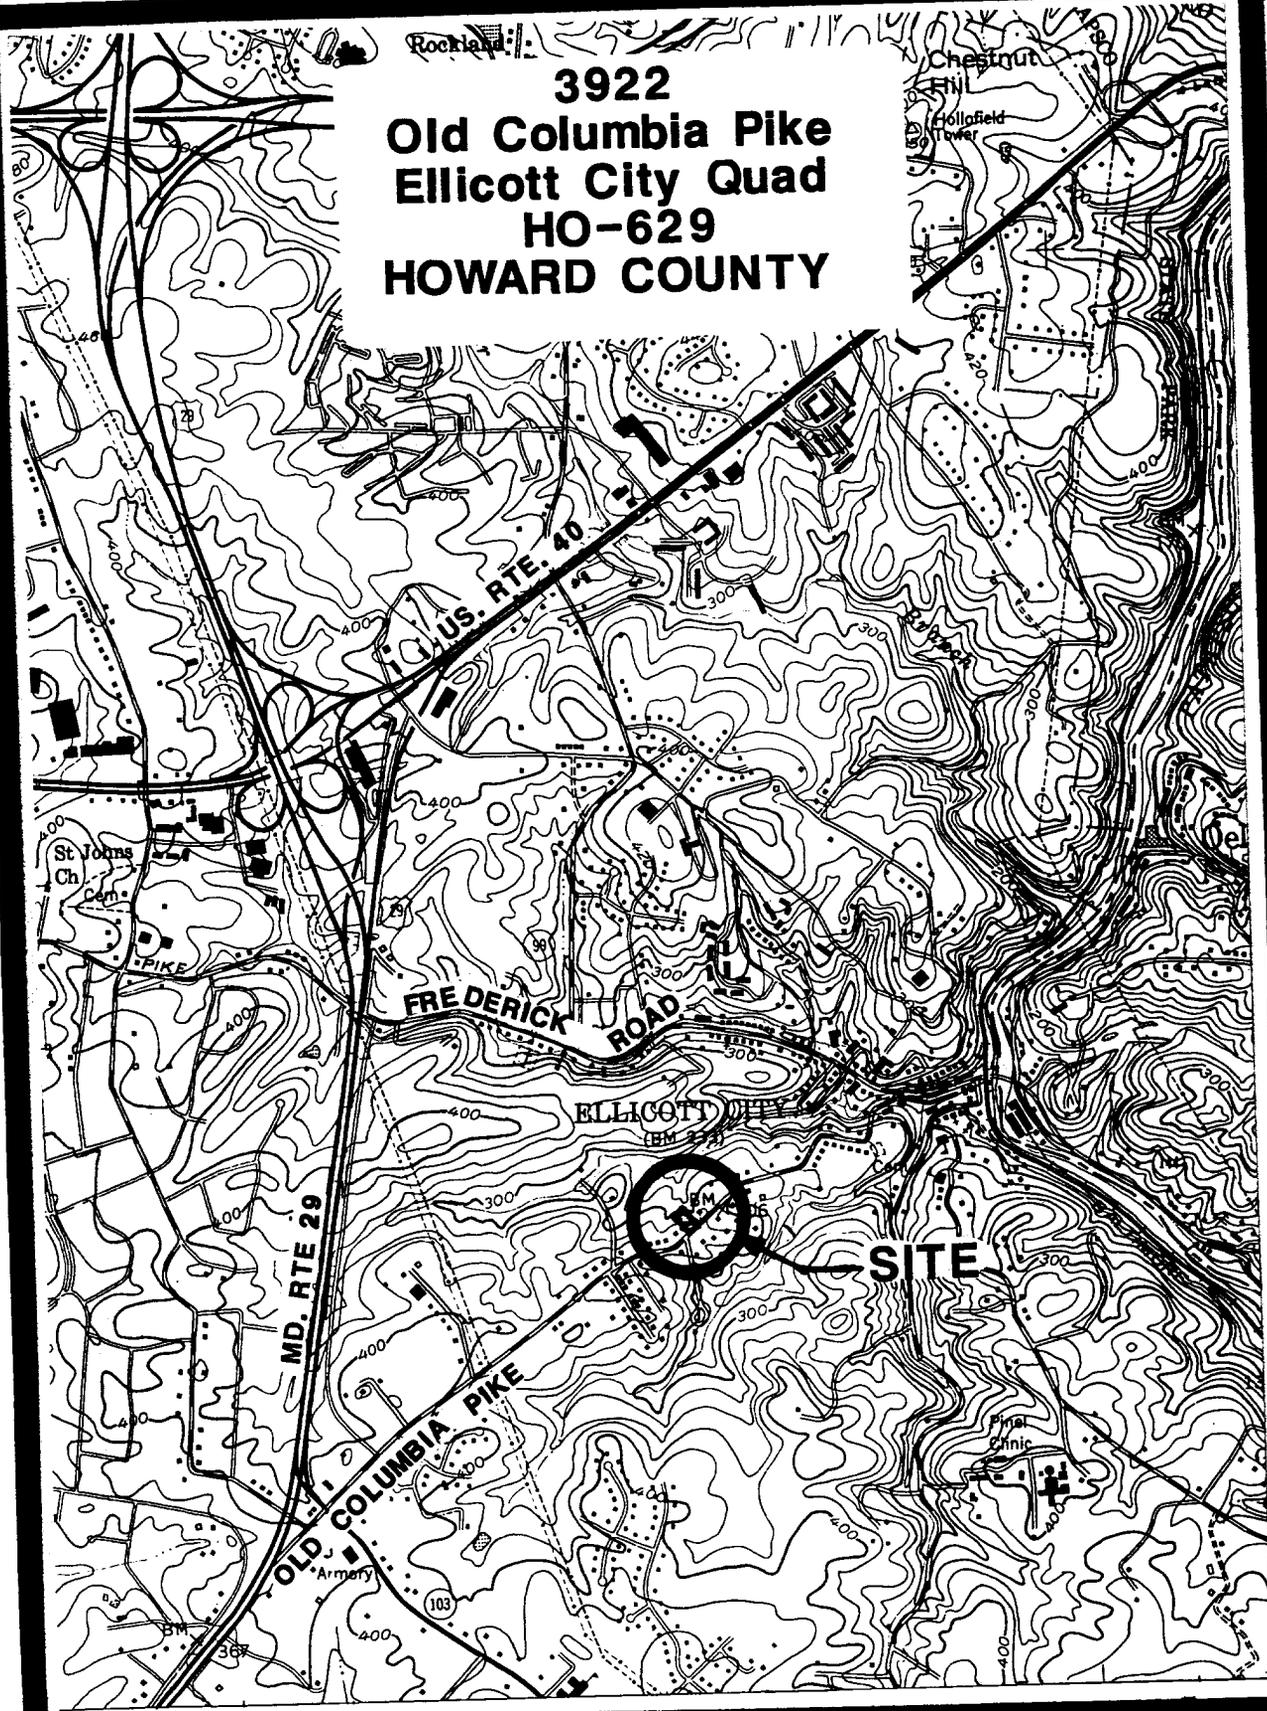

While there were planned developments along the B&O Railroad's Washington branch near Laurel dating from the late 19th century, this subdivision was one of the first of its kind in the northern section of the country. Unlike neighboring counties, Howard County never experienced the housing boom created by the arrival of rail and streetcar lines. This tract along Old Columbia Pike represents one of the few pre-World War II developments that exist in the county.

Like many prosperous merchants in downtown Ellicott City, August Stigler, a wholesale flour dealer, moved outside of town to the hillside along Columbia Pike in the early 1920s. After purchasing 20 acres from Caleb Rogers in 1928, Stigler subdivided his land into 12 lots of nearly equal size, roughly 1/3 of an acre. The lots were all 70 feet wide and about 200 feet deep abutting the Cat Rocks Branch stream valley.

According to his son, August Stigler Jr., Stigler was capitalizing on the success of the street car line which connected Ellicott City with Baltimore. He believed that people would be attracted to affordable lots within distance of the Ellicott City station.

Construction of these houses began in 1928, but at least three lots long remained empty because of the Depression. Although no documentation has been found to confirm their origin, Stigler's son believes a number of the houses eventually built were ordered from popular catalogues of the period. The style of this house and its neighbors suggest this theory is a valid one.

HOWARD COUNTY

No. 221

1. The first part of the document discusses the importance of maintaining accurate records in a business setting. It highlights how proper record-keeping can lead to better decision-making and financial stability. The text emphasizes that businesses should invest in reliable systems to ensure data integrity and security.

2. The second part of the document focuses on the role of technology in modern business operations. It explores how digital tools and software solutions can streamline processes, reduce costs, and improve overall efficiency. The author argues that embracing technology is essential for staying competitive in today's market.

3. The third part of the document addresses the challenges of data management and security. It discusses the risks associated with data breaches and the importance of implementing robust security protocols. The text suggests that businesses should regularly update their security measures and train employees on best practices for data protection.

4. The fourth part of the document discusses the impact of data on customer experience and marketing strategies. It explains how businesses can use data analytics to gain insights into customer behavior and preferences. This information can be used to tailor marketing campaigns and improve the overall customer journey.

5. The final part of the document provides a summary of the key points discussed and offers recommendations for businesses looking to optimize their data management practices. It encourages a proactive approach to data security and the continuous use of technology to drive business growth.
