Based on the information provided by SHA, Bridge #13022 does not meet the National Register Criteria for listing. The concrete slab structure was constructed in 1930 and was widened substantially (from 27' to 48') by the addition of prestressed concrete slabs on the west side. As a result of the 1959 alteration, the bridge no longer retains sufficient integrity for inclusion on the register. The bridge is not located in any known historic district.
