Unit Type	Count	Min. Lot Size
T-51 and T-52	480 S.F.	1,174 S.F.
T-54 and T-57	760 S.F.	1,247 S.F.
T-80, T-81, T-83, and T-84	836 S.F.	1,393 S.F.

Total Building Coverage: 15,050 S.F. (0.82 A.C.) of Section 2 Area 1

*Garage shall be used for parking purposes only, in accordance with Section 127, B.2.b. (18) of the Zoning Regulations.

- Tot. Lot Notes**
- Play structure and benches shall be Victor Stanley Model G95 and Model B (Philippine Mahogany) respectively.
 - Timber edge shall be DNO treated.
 - Tot. Lot area within timber edge shall be mulched.

- GENERAL NOTES**
- Topography was prepared by photogrammetric Data Services, Inc. in April, 1990.
 - Site will be served by public water and sewer.
 - All utilities shown as existing were compiled from available records and field survey. Contractor shall verify location of utilities prior to construction and notify of any discrepancies.
 - All work shall be performed in accordance with the Howard County Design Manual Volume IV.
 - References:
 - 5-88-12, 5-88-02, 99-224, F-87-41, SDP-87-81, VP-87-02, P-86-59, S-86-23, F-86-18, F-87-41, 87-296, P-86-25, S-87-21, P-86-15 and P-87-15.
 - Sediment Control and Stormwater Management for Section 2 Area 1 are provided by F-91-18 and F-87-41, respectively.
 - Where proposed curb is along a designated fire lane (shown as solid curb and gutter line, see legend), common "Red Traffic Paint" shall be used to paint the entire top and vertical surface of the curb. The painted surface shall extend for the full length of the designated fire lane. This type of paint is readily obtainable from the Baltimore Paint and Chemical Company or any similar source dispensing special-use paints. Paint may be applied by either brush or spray.
 - At each end of the fire lane, within the red painted area, the phrase, "NO PARKING - FIRE LANE" shall be painted in white letters no less than three (3) inches high on top of the curb. This phrase shall be repeated approximately every twenty feet (20') along the entire painted curb top surface. This phrase shall also be placed approximately every twenty (20) feet on the vertical face of the curb, offset by ten (10) feet with respect to the above markings on the top surface. However, in no event, shall there be less than two (2) such markings on the top of the curb and one (1) on the vertical face.
 - Max. Building coverage is 35% and max lot coverage is 40% per lot.
 - No clearing, grading or construction is permitted within the required wetland or stream buffers.
 - Garage units will receive curbside trash collection. Non-garage units will use modified on-street trash collection.

SEDIMENT CONTROL NOTES

1. A minimum of 24 hours notice must be given to the Howard County Office of Inspection and Permits prior to the start of any construction. (992-2437)
2. All vegetative and structural practices are to be installed according to the provisions of this plan and are to be in conformance with the 1983 MARYLAND STANDARDS AND SPECIFICATIONS FOR SOIL EROSION AND SEDIMENT CONTROL.
3. Following initial soil disturbance or redistribution, permanent or temporary stabilization shall be completed within: a) 7 calendar days for all perimeter sediment control structures, dikes and perimeter slopes and all slopes greater than 3:1, b) 14 days as to all other disturbed or graded areas on the project site.
4. All sediment traps/basins shown must be fenced and warning signs posted around their perimeter in accordance with Vol. 1, Chapter 12, of the HOWARD COUNTY DESIGN MANUAL, Storm Drainage.
5. All disturbed areas must be stabilized within the time period specified above in accordance with the 1983 MARYLAND STANDARDS AND SPECIFICATIONS FOR SOIL EROSION AND SEDIMENT CONTROL for permanent seedings (Sec. 51), sod (Sec. 54), temporary seedings (Sec. 50) and mulching (Sec. 52). Temporary stabilization, with mulch alone can only be done when recommended seeding dates do not allow for proper germination and establishment of grasses.

6. All sediment control structures are to remain in place and are to be maintained in operative condition until permission for their removal has been obtained from the Howard County Sediment Control Inspector.

7. Site Analysis:
 Total Area of Site: 790 Acres
 Area Disturbed: 400 Acres
 Area to be roofed or paved: 102 Acres
 Area to be vegetatively stabilized: 307 Acres
 Total Cut 0 Cu. Yds. BALANCED*
 Total Fill 0 Cu. Yds.
 Off-Site waste/borrow area location

* MASS GRADING SHALL BE DONE PER F-21-18.

8. Any sediment control practice which is disturbed by grading activity for placement of utilities must be repaired on the same day of disturbance.

9. Additional sediment control must be provided, if deemed necessary by the Howard County DPW Sediment Control Inspector.

10. On all sites with disturbed areas in excess of 2 acres, approval of the inspection agency shall be requested upon completion of installation of perimeter erosion and sediment controls, but before proceeding with any other earth disturbance or grading. Other building or grading inspection approvals may not be authorized until this initial approval by the inspection agency is made.

TEMPORARY SEEDING NOTES

Apply to graded or cleared areas likely to be redistributed where a short-term vegetative cover is needed.

Seedbed Preparation: Loosen upper three inches of soil by raking, discing or other acceptable means before seeding (unless previously loosened).

Soil Amendments: Apply 600 lbs per acre 10-10-10 fertilizer (14 lbs/1000 sq ft).

Seeding: For periods March 1 thru April 30 and from August 15 thru November 15, seed with 2-1/2 bushel per acre of annual rye (3.2 lbs./1000 sq.ft.). For the period May 1 thru August 14, seed with 3 lbs per acre of weeping lovegrass (.07 lbs./1000 sq ft.). For the period November 16 thru February 28, protect site by applying 2 tons per acre of well anchored straw mulch and seed as soon as possible in the spring, or use sod.

Mulching: Apply 1-1/2 to 2 tons per acre (70 to 90 lbs/1000 sq ft) of unrotted small grain straw immediately after seeding. Anchor mulch immediately after application using mulch anchoring tool or 218 gal per acre (5 gal/1000 sq ft) of emulsified asphalt on flat areas. On slopes, 8 ft or higher, use 348 gal per acre (8 gal/1000 sq ft) for anchoring.

Refer to the 1983 MARYLAND STANDARDS AND SPECIFICATIONS FOR SOIL EROSION AND SEDIMENT CONTROL for rate and methods not covered.

PERMANENT SEEDING NOTES

Apply to graded or cleared area not subject to immediate further disturbance where a permanent long-lived vegetative cover is needed.

Seedbed Preparation: Loosen upper three inches of soil by raking, discing or other acceptable means before seeding (unless previously loosened).

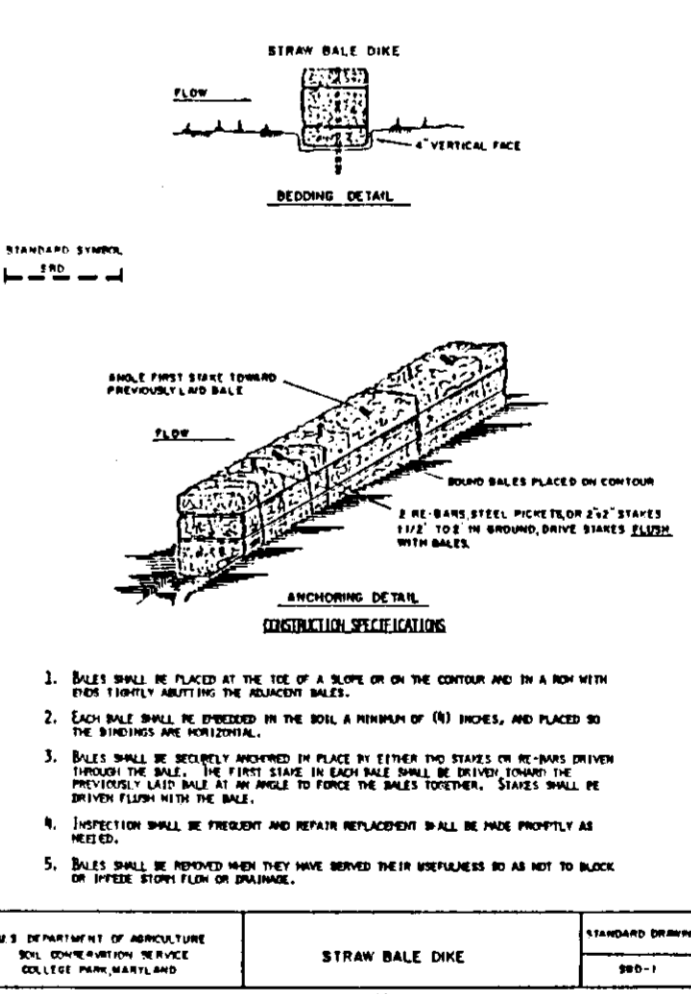

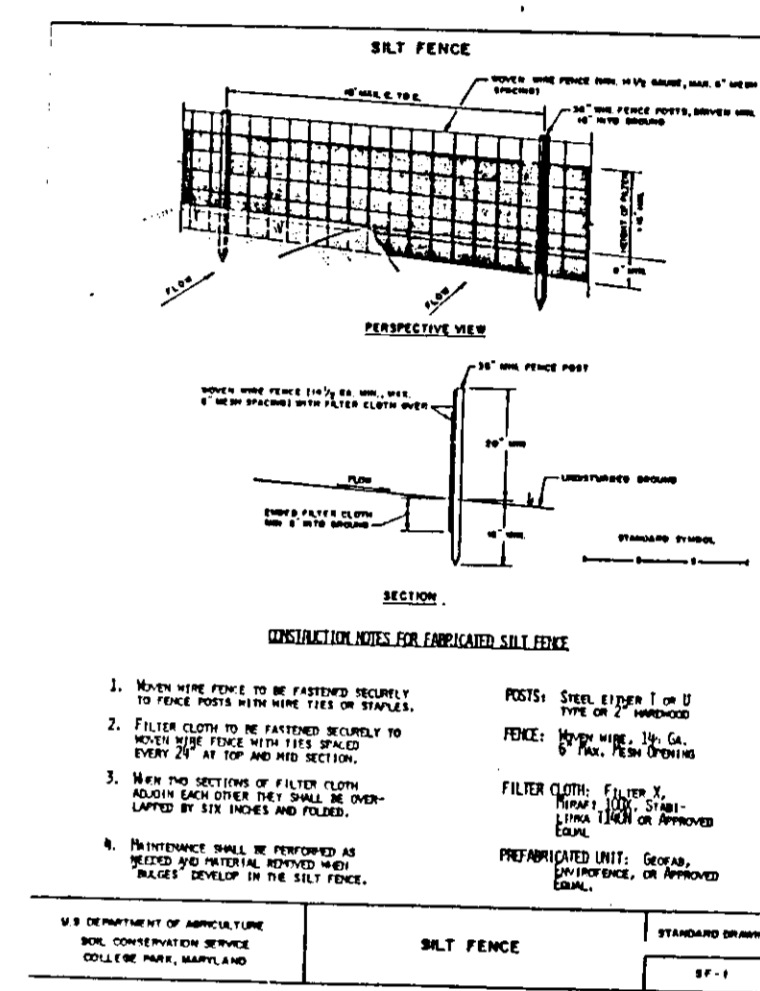

Soil Amendments: In lieu of soil test recommendations, use one of the following schedules

- 1) Preferred - Apply 2 tons per acre dolomitic limestone (92 lbs/1000 square feet) and 600 lbs per acre 10-10-10 fertilizer (14 lbs/1000 sq ft) before seeding. Harrow or disc into upper three inches of soil. At time of seeding, apply 400 lbs per acre 30-0-0 ureaform fertilizer (9 lbs/1000 sq ft).
- 2) Acceptable - Apply 2 tons per acre dolomitic limestone (92 lbs/1000 sq ft) and 1000 lbs per acre 10-10-10 fertilizer (23 lbs/1000 sq ft) before seeding. Harrow or disc into upper three inches of soil.

Seeding: For the periods March 1 thru April 30, and August 1 thru October 15, seed with 60 lbs per acre (1.4 lbs/1000 sq ft) of Kentucky 31 Tall Fescue. For the period May 1 thru July 31, seed with 60 lbs Kentucky 31 Tall Fescue per acre and 2 lbs per acre (.05 lbs/1000 sq ft) of weeping lovegrass. During the period of October 16 thru February 28, protect site by Option (1) 2 tons per acre of well anchored straw mulch and seed as soon as possible in the spring. Option (2) Use sod. Option (3) Seed with 60 lbs/acre Kentucky 31 Tall Fescue and mulch with 2 tons/acre well anchored straw.

Mulching: Apply 1-1/2 to 2 tons per acre (70 to 90 lbs/1000 sq ft) of unrotted small grain straw immediately after seeding. Anchor mulch immediately after application using mulch anchoring tool or 218 gallons per acre (5 gal/1000 sq ft) of emulsified asphalt on flat areas. On slopes 8 feet or higher, use 348 gallons per acre (8 gal/1000 sq ft) for anchoring.

Maintenance: Inspect all seeded areas and make needed repairs, replacements and reseedings.

DEVELOPER'S/BUILDER'S CERTIFICATE
 I/We certify that all development and/or construction will be done according to this plan, and that any responsible personnel involved in the construction project will have a Certificate of Attendance of a Department of the Environment Approved Training Program for the Control of Sediment and Erosion before beginning the project. I also authorize periodic on-site inspection by the HSCD.

- Sequence of Construction
1. Obtain Grading Permit.
 2. Arrange Field Meeting with Inspector.
 3. Install Sediment Control Devices As Shown on these Plans.
 4. Begin Construction of Townhouses.
 5. Upon Completion of Townhouses, Stabilize all disturbed Areas.
 6. Remove All Sediment Control Devices Only When Approval is Granted By the Sediment Control Inspector.
