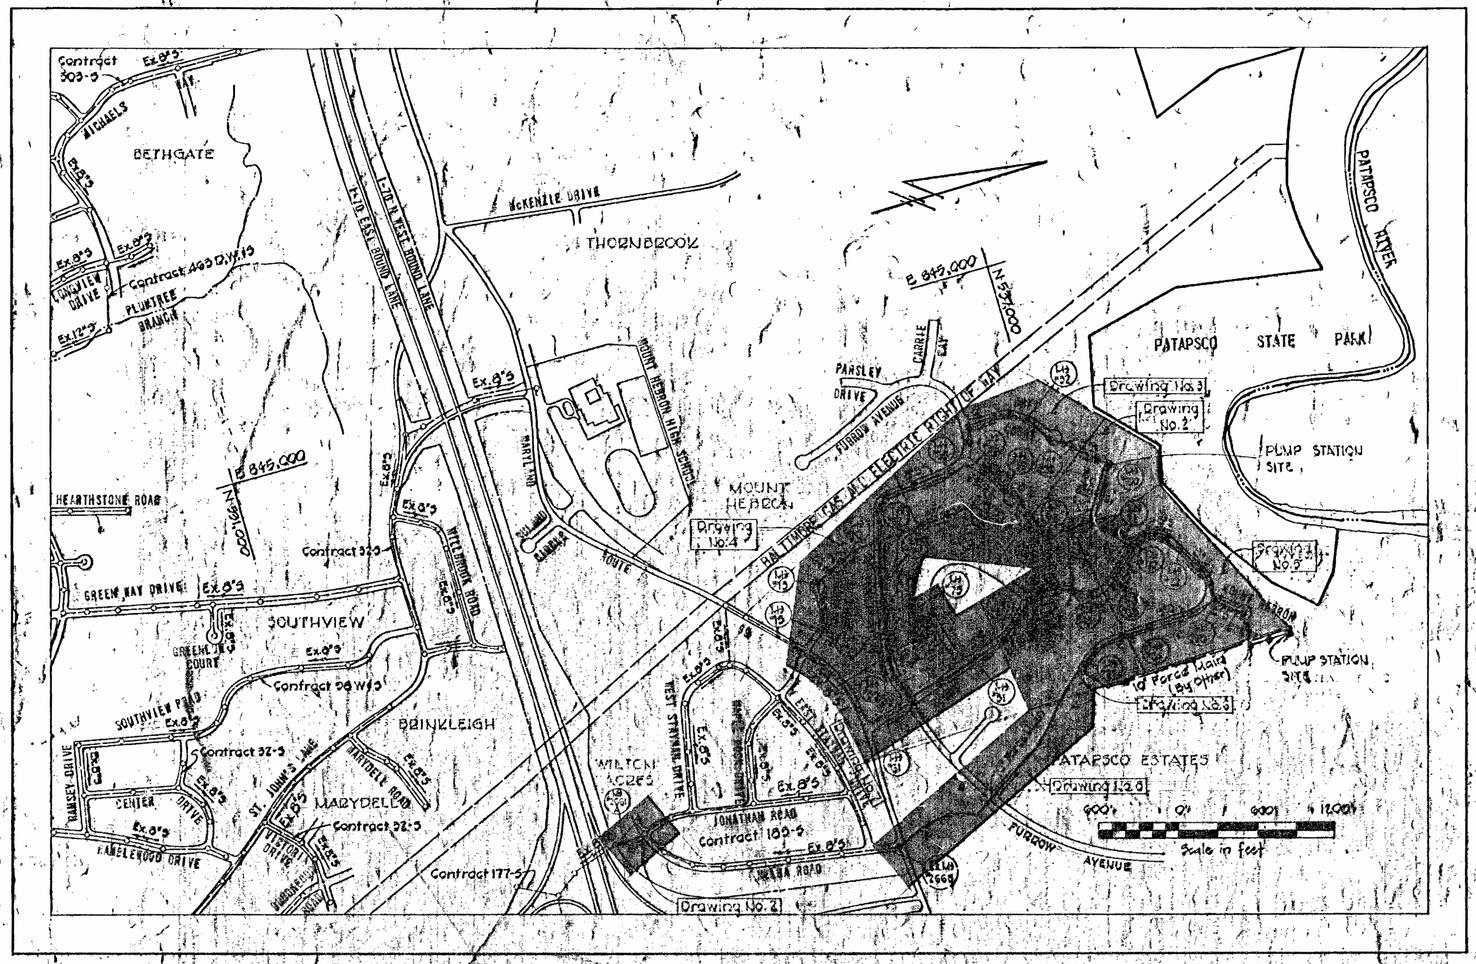
Manholes	349 V.F.	349 V.F.



GENERAL NOTES

1. Approximate location of existing utilities is shown. The Contractor shall take all necessary precautions to protect existing utilities and to maintain uninterrupted service. Any damage incurred shall be repaired immediately to the satisfaction of the Engineer by the Contractor at the Contractor's expense.
2. The Contractor shall locate existing utilities a minimum of two weeks in advance of construction operations in vicinity of utilities. Cost shall be included in the unit prices bid for excavation and backfill for mains.
3. Contractor shall notify the following utilities or agencies at least five (5) days before starting work shown on these plans:
   Miss Utility (Collect) 1-559-0100
   Baltimore Gas & Electric Company - Underground Electric Distribution Engineering "Damage Control" Mr. G.J. Zeller, Manager / 234-5691
   Baltimore Gas & Electric Company - Underground Gas Distribution Engineering, Mr. Bell - 234-5533
   Chesapeake and Potomac Telephone Co. - 723-9976
   State Highway Administration 531-5533
4. Clear all utilities by a minimum of 6". Clear all poles 2'-0" minimum or tunnel as required. Cost for tunneling or bracing at poles shall be included in the unit prices bid for excavation and backfill for sewer mains.
5. All pipe elevations shown are invert ⊘ elevations.
6. All manholes shall be 4'-0" inside diameter.
7. The Contractor shall provide a pipe joint in each sewer main within 2'-0" of exterior of manhole walls.
8. Watertight manhole frame and cover to be used where indicated on drawings Standard Details S-12 (ACB-83A). Where watertight manhole frame and cover is used, set top of frame 1'-6" above finished grade.
9. For details not shown on the Contract Drawings see Standard Details bound in the specifications.
10. Trees are to be protected from damage to the maximum extent.
11. Contractor shall remove trees, stumps and roots along line of excavation as directed by the Engineer. Payment for such removal shall be included in the unit price bid for excavation and backfill for sewer mains.
12. Place regulation "Men Working" and warning signs as required to comply with Maryland State Highway Administration Manual of Traffic Control for Highway Construction and Maintenance Operations.
13. All sewer mains shall be C.S.P.A., V.S.P.A., or (A.C.P.) Class 2400, unless otherwise noted.
14. Force mains shall be ductile iron, free class 51, in accordance with Section 9 of the specifications. Force mains shall have a minimum of 5 feet of cover.
15. Buttress or anchor all force main fittings with concrete. For details see Standard Details bound in the Specifications.
16. Horizontal and vertical controls are based on the Maryland State Grid Coordinate System.
