

HO-347
ST. PAUL'S RECTORY
Ellicott City
Private

1844

St. Paul's Rectory is basically a three story high, three bay wide granite block structure with north and south east bay rectangular entrances, and mansard roof with two north and south gabled roof dormers. (The mansard roof is a late 19th century addition.)

Built in 1844 it served as the second rectory for St. Paul's Catholic Church in Ellicott City as Castle Angelo served as its first while the present rectory was being constructed.

DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE	
<p>St. Paul's Stone Rectory is a three bay wide, one bay deep, three story high, mansard roof stone structure facing north.</p> <p>Fenestration is double-hung with six-over-six lights. Two dormer windows holding one-over-one lights are placed on the north and south elevations. They are flanked by fluted pilasters with curved bracket bases and sides surmounted by a triangular transom within an open pediment. Projecting flat wood sills decorate these windows. A single central third floor rectangular window similar to those described rests in the east wall. North and south rectangular doorways rest in the east bay. That on the south is covered by an open flat roofed porch which is approached by a canvas covered walkway on an iron frame, flanked by wrought iron railing. The entrance on the north is covered by a one story open porch decorated with scrolled brackets.</p> <p>* A one bay wide, one bay deep, 2 story gabled roof frame addition extends from the southwest corner. A further two bay wide, four bay deep shed roof frame addition springs from its west wall.</p>

STATEMENT OF SIGNIFICANCE

St. Paul's Rectory Significance Statement, Please see H0-76, St. Paul's School and H0-348 St. Paul's Catholic Church.

The first rectory for the priests to serve St. Paul's Church was at Castle Angelo H0-58 where the first catholic mass was said in its two story high chapel, now a living room. Father Coskery and Father Piot both made Castle Angelo their home until the completion of the rectory in 1844.

Later under the tenure of the Reverend Peter Tarro, (1883 to 1907) an additional floor was added to the rectory as well as the present mansard roof.

Situated on the west side of the church it serves as an architectural link between the church and the frame structure on the corner of College Ave. and St. Paul St. An early granite building, so indigenous to Ellicott Mills it is of outstanding significance individually as a fine example of Ellicott City's simple granite architecture as well as corporately as a part of the visual street scape along St. Paul's, blending its stone with that of St. Paul's Church. It should be incorporated into the National Register due to its architectural merit and its service as rectory to the first Roman Catholic Church in the area. Inclusion into the State Planning Critical Areas Program and any future local landmark legislation should also be assured.
