

H0-487  
The Manning Frame House  
Lisbon  
Private

3rd quarter  
nineteenth century

This modest frame house faces south on the north east corner of Day Alley and Route 144. It is a three bay wide, one room deep, two story high, gabled roof (running east-west) frame structure with square brick chimney in set into its west wall and a one story high, gabled roof (running north-south) living room frame addition centered on its south wall with rectangular south entrance located in its east bay. The original first floor, vertically aligned windows have been moved outward to provide space for this addition.

An additional south entrance, covered by a shed roofed open porch, is located on the south wall of a one story high, shed roofed frame appendage, running along the building's west wall, while the north elevation holds a shed roofed, one story high enclosed vestibule over the central north entrance.

Fenestration is proportionally scaled, vertically aligned and double-hung, holding six-over-six lights. Windows are flanked by flat pilasters, surmounted by flat wooden lintels and underlined by projecting wooden sills.

A small building in this location affiliated with the I.O.O.F. Building is delineated on the 1878 Hopkins Atlas.

## DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Manning Frame House is located on the north side of Route 144, just west of the I.O.O.F. Building. It is a three bay wide, one room deep, two story high, gabled roof (running east-west) frame house with square brick chimney inset into its west wall and a one story high, gabled roof (running north-south) living room frame addition centered on its south wall. The original first floor vertically aligned windows have been moved outward near the corners of the building to provide space for this addition. An additional south entrance, covered by a shed roofed open porch, is located on the south wall of a one story high, shed roofed appendage running along the building's west wall. This appendage holds small, square, four light and one light windows on the north and south sides of the west wall respectively.

Fenestration is proportionally scaled, vertically aligned and double-hung, holding six-over-six lights. Windows are flanked by flat pilasters, surmounted by flat wooden lintels and underlined by projecting wooden sills.

A single, square, four light, attic casement window is centered in the east and west walls, which hold no other apertures.

The north elevation holds a shed roofed, one story high, enclosed vestibule over the central north entrance. An eight light entrance door rests in its east wall with a rectangular six-six light window on its north wall and double four-four light window on its west wall.

This modestly scaled frame building links the Mayne Log Brick House with the old I.O.O.F. Building, which now houses a church and church school and is the present owner of the small frame building, located on the north east corner of old Day Alley and Route 144.

SPECIFIC DATES

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The Manning Frame House is significant to the town of Lisbon architecturally and historically.

Architecturally, it serves as an important visual element in the streetscape along the north side of Route 144, providing an important architectural link between the old I.O.O.F. Building, now housing the Church of the Open Bible and its school and the Mayne Log-Brick Building, HO-202, on the north west corner of Day Alley and Route 144.

The Manning Frame House is reminiscent of HO-229, the Roy Martin House, with the main body of each, being almost identical in scale, proportion, texture and building material. Appendages have been added to the Manning Frame House's south and west walls, while the Roy Martin House has extended its additions north and east.

Each links more significant buildings than itself together, and each provides a distinct charm by its unique scale and proportion. In both cases, rather large two story high, public buildings lie east; the Lisbon Post Office in the case of the Roy Martin House and the I.O.O.F. Building, now used for a church and school in the case of the Manning Frame House. In both instances too, more important and larger residences lie west; the Dorsey-John House west of the Roy Martin House, and the Mayne Log-Brick Building west of the Manning Frame House.

Historically, the Manning Frame House may well go back to the building indicated on the Hopkins' Atlas of 1878. In any case, its greatest significance lies architecturally in its use as an important visual element in the streetscape of the north side of Route 144 in the heart of Lisbon. This is all the more important when we realize that the Picket Log House across the street has already been dismantled and a new house constructed on its lot. The Log House was known as Noah's Ark and was owned by George Leach in 1878. This, along with the fact that a modern brick house has been constructed on the east side of the I.O.O.F. Building, between it and the old Presbyterian Manse, serve to enhance the value of this very modest frame building, just west of the I.O.O.F. Building which maintains the nineteenth century flavor of the town..

The Church of the Open Bible now owns the I.O.O.F. Building and the Manning Frame House. It is hoped that in its plans for expansion, it will be sensitive to the architectural significance of this building and might, for instance, restore the entire south elevation by demolishing the south living room addition and placing the first floor windows in their original location beneath the second floor windows.

CONTINUE ON SEPARATE SHEET IF NECESSARY

An addition could then extend northward, if necessary.

Important architecturally in conjunction with other nineteenth century buildings in the town of Lisbon, the Manning Frame House, with the entire town of Lisbon and HO-194, The Webb House, should be placed on the National Register of Historic Places and the State Critical Areas Program.
