## Forest Conservation Program

### Objectives
- To protect and enhance the forest resources within the area.
- To ensure sustainable use of forest lands.
- To maintain ecological balance in the region.

### Management Measures
- Implementation of controlled harvesting practices.
- Establishment of riparian zones to protect water quality.
- Protection of rare and endangered species.

### Floodplain Protection

- **Floodplain**: Contained within forest conservation easements.
  - Includes the area of the floodplain, river, stream, and adjacent wetlands.

### Easement Setup
- Easement to be set at 50 feet from the edge of the floodplain.

### Anchor Posts
- Should be installed at 5 feet intervals along the length of the fence.

### Enlargement
- Temporarily erect the treatment with 20-foot tape and 5-foot stake.

### Construction
- Construct the fence using 6-foot posts spaced 4 feet apart.

### Security Measures
- Ensure that the fence is secure and inaccessible to unauthorized access.

### Conclusion
- The implementation of forest conservation measures is crucial for the long-term sustainability of the area.

### Forest Conservation Sequence of Operations

1. **Planning**: Determine the forest conservation area and the type of operations needed.
2. **Preparation**: Clear the area of vegetation and debris.
3. **Construction**: Install the protective fence as specified.
4. **Maintenance**: Regularly check and maintain the fence for effectiveness.
