NOTES:

1. Development may be completed in 2 phases as provided in the plan.
2. Road construction may be completed and the separate phases of the individual parcel project(s) may be construed in accordance with the separate plans.
3. Upon completion of slope, earth berm is to be constructed in final location. Pipe slopes, drainage ditches, and storm drainage systems are to be completed in final location as shown. Runoff points from the proposed slope should be designed to reduce erosion and sedimentation in accordance with the requirements of the local government.
4. The site plan approved by the Planning and Zoning Commission should be submitted for review.
5. See detail for stabilization of fill slopes.

SLOPES/SURFACE DRAINAGE:

The site plan approved by the Planning and Zoning Commission should be submitted for review.

OWNER'S GUARANTEE:

I hereby guarantee that this plan is correct and true to the best of my knowledge and belief.
