NOTE: SEE SHEET 5 FOR RIP RAP DETAIL.
HANDLING AND PLANTING OF SEEDLINGS

HEELING IN BARE ROOT STOCK
- Gather the seedlings by stock number, species, and age group.
- Root balls should be inserted into the soil depth after planting.
- Planting depth should be 1/2 to 1 inch below the soil surface.
- Allow for proper drainage and water retention.

TREE BANKING
- Seedlings should be heeled in to prevent damage to the root system.
- The root balls should be placed in a shallow trench to protect the roots.
- Keep the rooting medium moist to promote root development.

HANDLING SEEDLINGS IN THE FIELD
- Ensure seedlings are properly heeled in before planting.
- Water the seedlings thoroughly after planting.
- Monitor for pests and diseases to prevent damage.

SEEDLING PLANTING METHODS
A. DEBME PLANTING
- Plant seedlings at the recommended planting depth.
- Ensure the roots are not damaged during planting.

NOTE:
- Check the soil moisture levels before planting to ensure proper hydration.
- Protect seedlings from mechanical damage during transplanting.

REFORESTATION PLANTING SCHEDULE
- Planting of seedlings should be done in the fall or spring.
- Check the soil moisture levels before planting.
- Monitor for pests and diseases to prevent damage.

C. CORRECT AND INCORRECT PLANTING DEPTH
- Correct planting depth should be 1/2 to 1 inch below the soil surface.
- Incorrect planting depth can cause root damage and poor growth.

SEEDLING AND WHIP PLANTING SPECIFICATION
- Seedlings should be heeled in before planting to ensure proper hydration.
- Monitor for pests and diseases to prevent damage.

NOTE:
- Regularly check the seedling health and water them as needed.
- Protect seedlings from mechanical damage during transplanting.

EXHIBIT 6-1
Tree Planting and Maintenance Schedule

Landscaping Contractor's Responsibilities
1. The planting of seedlings shall be performed in accordance with the approved plans.
2. The contractor shall be responsible for proper planting, staking, and maintenance of the seedlings.
3. The contractor shall be responsible for the removal of any damaged or dead seedlings.

B. MATTISON PLANTING
- Plant seedlings at the recommended planting depth.
- Ensure the roots are not damaged during planting.

NOTE:
- Check the soil moisture levels before planting to ensure proper hydration.
- Protect seedlings from mechanical damage during transplanting.

DIAGRAMS SHOWS THE CORRECT AND INCORRECT PLANTING DEPTHS.
