NO ASBUILT INFORMATION

FOREST CONSERVATION EASEMENT AREA
No. 2: SEE SHEET 26 FOR TOTAL AREA
SEQUENCE OF OPERATION

1. Contractor shall consult the AASHTO Book of Standards for the current traffic plans and rules for implementing temporary traffic control. The plans detail traffic control for working hours, ion and additional safety measures as needed for non-working hours as necessary.

2. Any work affecting the traveled portion of the roadway shall be restricted to the hours between 8:00 AM and 3:30 PM unless approved by the County’s Traffic Engineer.

3. Install advance warning signs and channelizing devices (e.g., portable fences) 50 feet (15 meters) in advance of the work zone.

4. Remove existing signs or movable barriers along the shoulder of the road.

5. Install new temporary signs and temporary and lighted permanent signs necessary for roadway and pedestrian safety.

6. Contractor shall maintain construction area back to existing grades at the end of the work day.

7. All temporary and permanent roadway shall remain open and unconstructed by any channelizing devices during periods of non-construction.

NOTE: The following standards are required for this project:

- MD 192.02-03 Shoulder width is 0.8 feet, no sharp edges
- MD 192.02-04 Paving, shoulder sale, 0.8 feet, no sharp edges

For all standards referred to on the plans the contractor must use the Book of Standards which will have the most current standard. The Book of Standards can be accessed at:

http://www.maryland.gov/transportation/administration/standardspublications/standardsmanuals/standardsmanuals.html

All signs to be constructed in accordance with the current version of the referenced standard in the book of construction.
