B-3.1 CONCERNS AND SPECIFICATIONS FOR SITE DESIGN AND MATERIALS.

1. The proposed development shall be designed and constructed in accordance with the requirements of this chapter.

2. The project shall be designed and constructed to minimize the impact on the surrounding environment.

3. The project shall be designed and constructed to provide adequate drainage and prevent erosion.

4. The project shall be designed and constructed to comply with all applicable codes and ordinances.

5. The project shall be designed and constructed to comply with all applicable standards and specifications.

6. The project shall be designed and constructed to comply with all applicable permits and approvals.

B-3.2 CONCERNS AND SPECIFICATIONS FOR SITE UTILITIES.

1. The proposed development shall be designed and constructed in accordance with the requirements of this chapter.

2. The project shall be designed and constructed to provide adequate utilities and services.

3. The project shall be designed and constructed to comply with all applicable codes and ordinances.

4. The project shall be designed and constructed to comply with all applicable standards and specifications.

5. The project shall be designed and constructed to comply with all applicable permits and approvals.

B-3.3 CONCERNS AND SPECIFICATIONS FOR SITE SECURITY.

1. The proposed development shall be designed and constructed in accordance with the requirements of this chapter.

2. The project shall be designed and constructed to provide adequate security and protection.

3. The project shall be designed and constructed to comply with all applicable codes and ordinances.

4. The project shall be designed and constructed to comply with all applicable standards and specifications.

5. The project shall be designed and constructed to comply with all applicable permits and approvals.

B-3.4 CONCERNS AND SPECIFICATIONS FOR SITE PROTECTION.

1. The proposed development shall be designed and constructed in accordance with the requirements of this chapter.

2. The project shall be designed and constructed to provide adequate protection and safety.

3. The project shall be designed and constructed to comply with all applicable codes and ordinances.

4. The project shall be designed and constructed to comply with all applicable standards and specifications.

5. The project shall be designed and constructed to comply with all applicable permits and approvals.

B-3.5 CONCERNS AND SPECIFICATIONS FOR SITE CONSTRUCTION.

1. The proposed development shall be designed and constructed in accordance with the requirements of this chapter.

2. The project shall be designed and constructed to provide adequate construction and maintenance.

3. The project shall be designed and constructed to comply with all applicable codes and ordinances.

4. The project shall be designed and constructed to comply with all applicable standards and specifications.

5. The project shall be designed and constructed to comply with all applicable permits and approvals.

B-3.6 CONCERNS AND SPECIFICATIONS FOR SITE CLEANUP.

1. The proposed development shall be designed and constructed in accordance with the requirements of this chapter.

2. The project shall be designed and constructed to provide adequate cleanup and restoration.

3. The project shall be designed and constructed to comply with all applicable codes and ordinances.

4. The project shall be designed and constructed to comply with all applicable standards and specifications.

5. The project shall be designed and constructed to comply with all applicable permits and approvals.

B-3.7 CONCERNS AND SPECIFICATIONS FOR SITE REUSE.

1. The proposed development shall be designed and constructed in accordance with the requirements of this chapter.

2. The project shall be designed and constructed to provide adequate reuse and recycling.

3. The project shall be designed and constructed to comply with all applicable codes and ordinances.

4. The project shall be designed and constructed to comply with all applicable standards and specifications.

5. The project shall be designed and constructed to comply with all applicable permits and approvals.

B-3.8 CONCERNS AND SPECIFICATIONS FOR SITE MACHINES.

1. The proposed development shall be designed and constructed in accordance with the requirements of this chapter.

2. The project shall be designed and constructed to provide adequate machinery and equipment.

3. The project shall be designed and constructed to comply with all applicable codes and ordinances.

4. The project shall be designed and constructed to comply with all applicable standards and specifications.

5. The project shall be designed and constructed to comply with all applicable permits and approvals.
