NOTE: ONLY THE GRADING SHOWN ON THIS SHEET IS TO BE PERFORMED UNDER THIS PLAN.
**TREE SHELTER INSTALLATION**

**Installation:**

- Measure shelter against tree trunk, making sure the top of the shelter is 12 inches above the ground.
- Centering the shelter over the tree trunk is recommended.
- Place the lower ring of the shelter on the ground.
- Fill the shelter with soil and water as needed.

**Maintenance:**

- Check the shelter regularly to ensure it is in good condition.
- Monitor the tree for any signs of damage.

**PROVIDE TREE SHELTERS FOR ALL AFFORESTATION PLANTINGS**
