This development plan is approved for soil erosion and sediment control by the Board of Public Conservation District.

Signatures

Date

Notes:
1.1 Construct and stabilize diversion ditches and stone filters.
1.2 Grade new road.
1.3 Install stone drainage structures and temporary silt fence.
1.4 Rear road.
1.5 Stabilize disturbed areas.
1.6 Remove all sediment control measures upon approval of Board of Public Conservation District.

Sectional Cut-Off Filter

Typical Diversion Dam

FeederSpecifications for Diversion Dam:

- 1.5 ft. deep, 5% embankment
- Wood planks 1.5 in. thick
- 1.5 ft. wide

Sectional Cut-Off Filter

Feeder Specifications for Diversion Dam:

- 1.5 ft. deep, 5% embankment
- Wood planks 1.5 in. thick
- 1.5 ft. wide

Note:
- Sediment control measures are to remain in place through the duration of this construction from the start to the completion of all construction.
- Existing vegetation should be maintained at all times to prevent soil erosion and stabilization of all areas.
