STORM WATER MANAGEMENT CRITERIA

Peak flows resulting from a two-year frequency storm prior to development will not be exceeded following reviewing two-year frequency storms after development.

SMALL POND CRITERIA

Oriental spillway will be designed to contain the storm below the crest of the emergency spillway. The emergency spillway is designed to pass a 50-year storm.
STORM WATER MANAGEMENT CRITERIA

Peak flows resulting from a one-year frequency storm prior to development will not be expected during designing two-year frequency storms after development.

SMALL POND CRITERIA

The pond will be designed to contain 50% of the stormwater volume for the 50-year frequency storm. The emergency spillway is designed to pass a 50-year storm.
**DEVELOPMENT NO. 61**

**PROJECT TITLE**: GRAY ROCK FARM

**LANDSCAPE PLAN**

**SCALE**: 1" = 100' (no scale)

**NOTE**: The county may require the developer to provide for trees to be planted in the right-of-way or on private property. The developer shall replace any trees that die within one (1) year after initial planting.

**PROPOSED PLANTING**

- **PLANTING WITHIN ROW**
  - Specified species
  - Edge of right-of-way
