GENERAL NOTES

1. All work shall be performed in accordance with Howard County Standards, Specifications and Details for Construction.

2. All utility companies shall be notified 24 hours in advance of construction.

3. All highs shall be Howard County Standard unless otherwise noted.

4. All street curb returns shall have 30 ft. radii unless otherwise noted.

5. Storm drain inlets within road right-of-way shall be backfilled and compacted in accordance with Howard County Road Cods.

6. Approximate location of existing utilities shall be shown. The contractor shall take all necessary precautions to protect the existing utilities and to maintain uninterrupted service.

7. Any damage caused due to contractor's operations shall be repaired immediately at contractor's expense.

8. The contractor shall test all existing utilities where struck by the engineer a minimum of two weeks in advance of any construction.

9. Temporary compacted 18" high earth fill dikes shall be constructed above the top of fill slopes on the ROW and adjacent to disturbed areas at the end of each day.

10. Contractor to notify Howard County Deputy Director of Operations and Permit of at least 3 days before starting work shown on these drawings.

11. Pre-existing structures for storm drain structures shall have a minimum of 28 days with a minimum of 3500 psi.

12. All sidewalks and medians shall be permanently sealed.

13. Traffic control devices and their installation shall be in accordance with the manual on uniform traffic control devices, 1975, revised edition.

14. Slackwater (filter cloth 7-600) or equivalent shall be placed on soil under rip-rap (full size and length of stone).

15. Stone for rip-rap shall be specified on the drawings. All rip-rap shall be specified.

16. All stone drain within the public right-of-way shall be C-22 minimum.

17. Embanking fill shall be removed and placed until backfilled completely.
