Note: 06/14/16 Capital Project D-1153 Lot 526 Velvet Path Pond Principal Spillway and Channel Stabilization Project. Project replaces the existing flow splitter and constructs new sand filter, 15-inch RCP diversion pipe, 24-inch RCP bypass pipe, riser structure and 30-inch RCP principal spillway. Embankment elevation lowered and existing 15-inch RCP diversion pipe, 24-inch RCP bypass pipe, and riser structure are removed. In-stream stabilization installed downstream of the pond outfall.
