EARTH DIKE DETAIL (E.D.)

CONSTRUCTION NOTES:
1. The location and elevation of the dike are shown in the plan view.
2. The dike is designed to be constructed using standard dike construction techniques.
3. The dike will be reinforced with riprap along the upstream face.
4. The dike will be backfilled with compacted soil.
5. The dike will be monitored for stability and any necessary adjustments will be made.

Solar Panel Array

1. The solar panel array is designed to be installed on the top of the dike.
2. The array will be secured to the dike using standard methods.
3. The panels will be connected to a solar inverter and power substation.
4. The system will be monitored for performance and efficiency.

CONSTRUCTION SEQUENCE:
1. Site preparation
2. Foundation work
3. Solar panel installation
4. Electrical work
5. Completion and testing
