SEQUENCE OF CONSTRUCTION

1. Obtain grading permit.
2. Install drainage structure as shown in the plan.
3. Install temporary 6" PVC as shown.
4. Install all sediment control measures as shown on the Plan, including construction materials, fence, degraders, and sheet piles.
5. Construct all drains and structures shown on the Plan, using reinforced concrete andHDPE. 
6. Grade road and sidewalk at drainage system and utilities. Control temporary 6" PVC to SCL.
7. Verify all drainage structures. Remove temporary 6" PVC & make connections to be in place.

* Remove all sediment control measures after approval from the Howard County Sediment Control Inspector.
