WATER QUALITY CONSTRUCTION SPECIFICATIONS

POLICY: All contractors and subcontractors engaged in the construction of the project shall follow the specifications and guidelines established by the North Carolina Department of Environmental Quality for the protection of water quality.

1. All contractor's daily reports shall be submitted to the project manager for review before the work is continued.

2. All materials shall be stored and handled in a manner that minimizes the risk of contamination of water sources.

3. All excavations shall be backfilled with clean fill material to prevent the introduction of contaminants into water sources.

4. All stormwater runoff shall be diverted away from water sources to prevent contamination.

5. All construction activities shall be conducted in accordance with the approved site plan.
