PLANTING SPECIFICATIONS AND NOTES

1. SITE PREPARATION AND SOILS

1.1. Description of soils should be included in the Planting Field Plan but may be found in the plant list. The soil description should be based on information from the soil survey map, which should be included with the planting field plan. Soil condition should be documented at the time of planting to ensure accurate evaluation.

1.2. In areas of mixed slopes, the planting field should be divided into sections on the basis of soil type and slope. A planting field of 10 acres is a good size for these studies.

1.3. Soil mix for all plantings should be native soil with no amendments. Planting mix is a mixture of organic materials and soil amendments that are specifically designed to improve soil quality. Amendments such as organic materials and soil amendments may be required to improve soil quality.

2. PLANT STORAGE AND TRANSPORTATION

2.1. For optimal results, trees should be transported and planted in the fall after chilling. Trees should be monitored for health and quality before planting.

2.2. Planting areas should be considered open to public access. Trees should be protected from public access. Trees should be replaced if necessary.

3. PRE-PLANT ACTIVITIES

3.1. Pre-planting activities should be performed to prepare the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

3.2. Pre-planting activities should be performed to prepare the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

3.3. Pre-planting activities should be performed to prepare the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

3.4. Pre-planting activities should be performed to prepare the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

3.5. Pre-planting activities should be performed to prepare the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

3.6. Pre-planting activities should be performed to prepare the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

3.7. Pre-planting activities should be performed to prepare the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4. POST-PLANT ACTIVITIES

4.1. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.2. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.3. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.4. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.5. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.6. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.7. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.8. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.9. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.10. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.11. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.12. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.13. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.14. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.15. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.16. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.17. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.18. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.19. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering

4.20. Post-planting activities should be performed to maintain the planting site. These activities include:

   a. Soil preparation
   b. Mulch placement
   c. Watering
RIDGEBACK VIEW
4TH ELECTION DISTRICT
HOWARD COUNTY, MARYLAND
ROADS, STORMWATER MANAGEMENT AND
STORM DRAINAGE CONSTRUCTION PLANS

GENERAL NOTES
1. All construction shall be in accordance with the latest standards and specifications of Howard County plus other applicable local standards.
2. All construction shall comply with the provisions of Public Works Department of Howard County.
3. Site plans must be submittable to the Howard County Planning Board at least 30 days prior to the start of work.
