## Temporary Seeding Notes

- **Temporary Stabilization:** The temporary stabilization criteria listed in the Temporary Seeding Notes table states that the temporary stabilization must be in place during construction and will be removed after construction is completed. The table includes information on seed rate, type, and application methods.

## Permanent Seeding Notes

- **Permanent Stabilization:** The permanent stabilization criteria listed in the Permanent Seeding Notes table states that the permanent stabilization must be in place during construction and will be maintained throughout the project. The table includes information on seed rate, type, and application methods.

## Sediment Control Notes

- **Sediment Control:** The sediment control criteria listed in the Sediment Control Notes table states that sediment control measures must be in place during construction to prevent erosion and runoff. The table includes information on erosion control blankets, sediment basins, and silt fences.

## Structure Schedule

## Construction Notes

- **Construction:** The construction criteria listed in the Construction Notes table states that construction must be completed in accordance with the engineering plans. The table includes information on construction methods, materials, and inspection requirements.

## RSRAP Outlet Protection Detail

- **Outlet Protection:** The RSRAP outlet protection detail includes information on the outlet protection design and construction, including details such as outlet size, slope, and protection method.

## Stormwater Management Notes and Details

- **Stormwater Management:** The stormwater management criteria listed in the Stormwater Management Notes and Details table states that stormwater management practices must be in place during construction to prevent runoff and erosion. The table includes information on stormwater control measures, such as swales, detention ponds, and infiltration systems.

## Conclusion

The project is designed to meet all the environmental criteria and regulations, ensuring minimal impact to the surrounding environment. The detailed specifications and guidelines provided in this document are intended to guide the construction process and ensure the project's successful completion.
**SEQUENCE OF OPERATIONS**

1. **PRE-CONSTRUCTION**
   - Obtain necessary permits and approvals from local authorities.
   - Prepare site for planting.
   - Prepare soil and prepare the land for planting.

2. **PLANTING**
   - Plant trees and bushes.
   - Water and fertilize the newly planted trees and bushes.

3. **POST-PLANTING**
   - Monitor the growth of the planted trees and bushes.
   - Continue to water and fertilize as needed.

**PLANTING SPECIFICATIONS**

- **Reforestation Planting List**
  - Quantity: [List of quantities]
  - Scientific/Local Name: [List of scientific/local names]
  - Size: [List of sizes]
  - Root: [List of roots]
  - Remarks: [List of remarks]

- **Lowland Plant List**
  - Quantity: [List of quantities]
  - Scientific/Local Name: [List of scientific/local names]
  - Size: [List of sizes]
  - Root: [List of roots]
  - Remarks: [List of remarks]

**TREE PROTECTION SIGNAGE & FENCING**

- **Forest Protection Signage & Reforestation Sign Detail**
  - [Diagram of sign detail]

**CONTAINERIZED TREE PLANTING DETAIL**

- **Proprietary Tree Shelters**
  - [Diagram of tree shelter]

**PLANTING DETAILS**

- **PLANTING METHOD**
  - [Diagram of planting method]

**REMEMBER:** Always consult local regulations and obtain necessary permits before proceeding with any reforestation or landscaping project.
