**PLANTING SPECIFICATIONS**

1. Tree species, size, and variety shall be as agreed upon by the Architect and Engineer.
2. Trees shall be planted in soils that are well drained and not subject to flooding.
3. Trees shall be planted at the correct depth, with the top of the root ball at ground level.
4. Trees shall be staked with trees to be staked having a capacity of 100 lbs or more.
5. Trees shall be pruned to remove dead, diseased, or damaged limbs.

**SEQUENCE OF CONSTRUCTION**

1. Site preparation should be completed before tree planting.
2. Trees should be planted in groups to ensure proper spacing.
3. Trees should be watered after planting to promote root growth.

**SURVEY FOR REDEVELOPMENT**

1. A site survey shall be made before tree planting to ensure proper placement.
2. Trees shall be planted in groups to ensure proper spacing.
